

CLIMATE CHANGE

The sun is burning hotter the rain won't fall
The earth is getting drier, can't take it all
Rivers are drying, forest on fire
But no one seems to notice, no one's inspired

Chorus

Oh, climate change, you're making life so hard
I see the signs but folks just disregard
We are crying for help, but the sky stays mute
If we don't act now, we lose the earth for good

Strophe 2

Glaciers are melting
Disease running fast Nature's warning us
But how long will we last?
The storms are raging Tearing down homes
But we keep pretending Like it's all unknown

Chorus

Oh, climate change
You're making life so hard
I see the signs but folks just disregard
We are crying for help, but the sky stays mute
If we don't act now, we lose the earth for good

We could make a change but time's running fast
Hand in hand against the flames let's make it last

Strophe 3

The future of our children is in our hands
But so many stand still like they don't understand
But I'll keep on fighting so long as I can
If you rise up now there's hope for this land

Chorus

Oh, climate change
You make life so hard
I see the signs but folks just disregard
We are crying for help, but the sky stays mute
If we don't act now, we lose the earth for good
If we don't act now, we lose the earth for good
If we don't act now, we lose the earth for good
